The request filed on February 18, 2003 for a continued Prosecution Application (CPA) under 37 CFR 1.53(d) based on Application No. 09/528,963 is acceptable and a CPA has been established. An action on the CPA follows.

Applicant elected the methods of claims 1-6 wherein the agent for preventing ovarian cancer is progestin product with traversed in Page No. 6. The claims are being examined as they read an the progestin product.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over the WO 98/0771 publication of record, published on March 19, 1998.

The instant application was has an effective date of March 21, 2000. the WO 98/10771 publication on page 12 lines 29-30 state that "progestin product in preparation of a non-contraceptive medicament for prevention of ovarian cancer in a female subject..." on page 14, lines 3-8 given routes of delivery of progestin products including oral, injectables, implant, etc, as well as vaginal creams and suppositories and page 10,

Art Unit: 1614

line 30 "administering the progestin product at a daily dose..." The instant claims read on a composition of progestin products alone which is taught by the prior art publication.

Claims 1, 2, 5 and 6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term "regimen" in claim 6 fails to find basis in claims 1, 2 and 5.

Applicant is advised that should claim 2 be found allowable, claims 3-5 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).
